SUMMARY

Front-End developer, likes to create non-standard products to facilitate the everyday life of people and businesses. I have deep knowledge of HTML, CSS, SCSS, as well as experience with JavaScript and React. During work, I use BEM/Scrum methodologies. I am a quick learner, responsible and ready for challenges.

STUDY PROJECTS

GO SURF, Git link [HTML, SCSS, JS, GULP]
Adaptive layout of the site, based on the example of classes on YouTube. Create project on github, layout and check for build errors and publish.

SoYummy, Git link [React, Tailwind, NodeJs]
These tasks required being able to work in a team, understand someone else's code, correctly connect to it or reuse it in your task, work with the API, write the styles of the light and dark theme of the application, and use animation.

Ice-cream, Git link [HTML, SCSS, JS, Parcel]
Team training layout during the course in GO-IT. Assembly using Parcel, adaptive layout, using the BEM methodology. My task was to provide assistance with the difficulties that arise and the layout of the advantages block.

WORK EXPERIENCE

2021

Front-End developer (freelancer)

Layout and tensioning of sites for WordPress CMS and OpenCart, remote work.
